DATE ACQUIRED	This is UNEVALUATED Information		

ADDITIONAL APPRAISAL OF CONTENT IS TENTATIVE.

The Gray Iron Foundry of the Bohumin Gustav Kliment Iron Works (Bohuminske zelezarny Gustava Klimenta), National Enterprise, in Bohumin produces rerolled steel products, sections and rounds only. Siemens-Martin steel is used. The rolling mill is thought to be almost certainly of pre-war manufacture, but no details of the installations of the works can be given. Three shifts are being worked. The number of workers cannot be estimated with confidence. Some 10,000 tons of products are produced annually. The works operate almost certainly at full capacity, and there has been no discussion of the possibility of extending this mill. Aside from the lack of skilled workers which is common to most of the iron and steel industry, no factors affecting production are worthy of note.
